### WORK EXPERIENCE

#### **ASAS - Aluminum (Intern)** July 2019- August 2019

Worked over the summer, I was involved in the marketing steps of the company's products. I played a role in both stores and in factory fields. I was involved in the process of producing military pipes, these pipes are responsible for building quick defense zones with their durability and lightness.

#### **Greatr (UI/UX DESIGNER, Website Developer)** October 2020 - April 2021 <https://greatr.org>

I participated in the creation of designs for the Greater website, Developing Frontend. Created wireframes, feeds, and sitemaps to effectively communicate interaction and design ideas. Writing and executing basic SQL Queries, I have been given a Technological advisor role in the project.

#### **ODO (UI/UX DESIGNER, Website Developer)** October 2020 - Present <https://odoconnect.com/>

I have been given a Technological responsibility in the project. I am responsible for the development of the website and its hosting. With my friends, we decided to build a social platform that can help people to study where ever they want. Serve24 is a mobile application that provides digital integration between clubs and people who want to do sports. It has been active with tennis.

#### **Serve24 (UI/UX DESIGNER, Sales Assistance)** January 2021 - Present <https://serve24.ca/>

Serve24 is a mobile application that provides digital integration between clubs and people who want to do sports. It has been active with tennis. I participated in this project to develop my flutter knowledge and discover new tools for application development.
